## RE: OFFICIAL INVITATION FOR THE INSTITUTION TO JOIN THE NCDS YOUTH COMPETITION 2019

*\*NCDS are non-communicable diseases like cancer, heart diseases, long term lung diseases, diabetes and mental health*

Greetings,

NCDS Youth Champions is a nationwide project in Kenya running across universities, colleges and Community Based Organizations. The project aims at working together with the youth to create independent series of events which educate the communities on non-communicable diseases.

Stowelink is partnering with Non Communicable Diseases Alliance in a bid to create a global movement engaging young people across the country to be ambassadors of non-communicable diseases.

It's in this light that we are requesting you join the movement to create awareness on prevention of various NCDS through events and activities taking about NCDS like cancer, diabetes, mental health, obesity amongst others.

The students will benefit from the experience thus sharpening their knowledge around health care, they will also receive certificates of participation from us. The institution will receive a certificate of commendation and will be listed as one of the institutions which joined in this inaugural national wide movement which is set to go global from next year. *Attached is a document that gives in-depth information on the project.*

We are asking your institution to join the movement and together we could beat NCDS and avoid unnecessary deaths and suffering caused by lack of information on these NCDS. Thank you so much and we are looking forward to partnering with you.

Kind regards

Ogweno Stephen
